CAPABILITY STATEMENT

# Reitech Gas Management Solutions

## Gas Drainage System Installation, Maintenance, and Recovery

Reitech Services is your trusted partner in managing gas fields for production and mining safety. With our technical expertise, we are equipped to establish and maintain your Gas Drainage Management Plan, implementing essential controls, and continuously monitoring and verifying operations to ensure safety and efficiency.

### *Our end-to-end services include:*

- **Design and Engineering:** Tailored solutions to meet the specific needs of your gas drainage and management systems.
- **Procurement and Supply:** Sourcing high-quality components and equipment necessary for optimal operation.
- **Installation:** Expert installation services to ensure your gas drainage systems are set up correctly and efficiently.
- **Operations and Maintenance:** Ongoing support and maintenance to keep your systems running smoothly and safely.

We offer turnkey solutions, providing comprehensive services that cover every aspect of gas drainage management. Our inventory includes gas drainage extraction skids and gas gathering networks, available for both hire and purchase.

Partner with Reitech Services for reliable, high-quality gas management solutions that enhance safety and productivity in your mining operations.
